Re: Docket #99P-4613

gentlwomen, Gentlemen:

It should be no secret to man or beast that BGH is unhealthy to inject for both cows and humans! Cows eat the proper diet for themselves. men should quit interfering with nature.

Though BGH may fatten the bank accounts of large scale dairy operations I would hope the FDA is more concerned with the welfare of Americans.

I am urging Truth in labeling for anything with BGH in the milk drinks. I request that we ban that we ban the use of BGH in Americas Dairies.

Please ACT od Docket #99P-4613

Most European Countries as well as Canada have banned BGH treated dairy products because of unknown factors. Half of our dairy cows suffer from painful mastitis, because of the BGH inducing insulin type growth factors. We do see prostate and breast problems in men and women, respectively. This is from IGS-1, whic makes one wary of this additive to our national miksupply! "unknown" but clearly indicative of problems in thatwe see increasing evidence of the symptoms. today, milk is no longer the all American drink it used to be. The fat content, tends to clog arteries, causes asthma, allergies high blood pressure and stroke. Juvenile onset diabetes, and even cancer are according to some honest researchers, from milk.

America is the only country which allows its cows to be injected with BGH and our economists at Cornel have discovered that although it does increase milk output, it raises ovrall production co

Monsanto will "sell" this to us but the public increasingly becomes aware of the dangers and the cruelty to the animals involved. One day how many of the factories cows will have to shot! Who wants to eat BGH in ANY form? NOT ME! (Of course I do not eat "meat" nor drink calfbeverage.) However, I believe Docket#99P-4613 is crucial to America's health and economy. canada has banned BGH as "unacceptable to the health of cows! Bladder infections, and udder problems, ulcers and even lameness. I am concerned about the cruelty to these animals as well qg the health and welfare of the children of America. Please insist on the ban. Thank you,
